**The Problem with Education Technology** - Ben Fink 2016-02-02

"Education is in crisis—at least, so we hear. And at the center of this crisis is technology. New technologies like computer-based classroom instruction, online K-12 schools, MOOCs (massive open online courses), and automated essay scoring (AES) may be our last great hope—or the greatest threat we have ever faced. In *The Problem with Education Technology*, Ben Fink and Robin Brown look behind the hype to explain the problems—and potential—of these technologies. Focusing on the case of automated essay scoring, they explain the technology, how it works, and what it does and doesn't do. They explain its origins, its evolution (both in the classroom and in our culture), and the controversy that surrounds it. Most significantly, they expose the real problem—the complicity of teachers and curriculum-builders in creating an education system so mechanical that machines can in fact often replace humans—and how teachers, students, and other citizens can work together to solve it. Offering a new perspective on the change that educators can hope, organize, and lobby for, *The Problem with Education Technology* challenges teachers and activists on "our side," even as it provides new evidence to counter the profit-making, labor-saving logics that drive the current push for technology in the classroom."

Assessment in the Second Language Writing Classroom - Deborah Crusan 2010-07

Assessment in the Second Language Writing Classroom is a teacher and prospective teacher-friendly book, uncomplicated by the language of statistics. The book is for those who teach and assess second language writing in several different contexts: the IEP, the developmental writing classroom, and the sheltered composition classroom. In addition, teachers who experience a mixed population or teach cross-cultural composition will find the book a valuable resource. Other books have thoroughly covered the theoretical aspects of writing assessment, but none have focused as heavily as this book does on pragmatic classroom aspects of writing assessment. Further, no book to date has included an in-depth examination of the machine scoring of writing and its effects on second language writers. Crusan not only makes a compelling case for becoming knowledgeable about L2 writing assessment but offers the means to do so. Her highly accessible, thought-provoking presentation of the conceptual and practical dimensions of writing assessment, both for the classroom and on a larger scale, promises to engage readers who have previously found the technical detail of other works on assessment off-putting, as well as those who have had no previous exposure to the study of assessment at all.
