[The Cailiffs of Baghdad, Georgia: A Novel](#) - Mary Helen Stefaniak 2011-09-19

A hidden history of the South emerges when a worldly teacher leads Threestep, GA, to reinvent itself, setting in motion events that lead to triumph and tragedy for the black teenager who happens to be the smartest person in Piedmont County, Georgia, in 1938-39. As an epigraph from *The Souls of Black Folk* by W. E. B. Du Bois reminds us at the start of this novel, "Throughout history, the powers of single black men flash here and there like falling stars, and die sometimes before the world has rightly gauged their brightness." Protagonist Theo Boykin is a genius, an artist, an inventor, a Leonardo DaVinci-type, whose talents are sought after by local blacks and whites alike, but even this is not enough to save him. He falls victim to "the tragedy of ignorance and the damage caused by fear," in the words of poet Rita Dove—the first African American to serve as U.S. Poet Laureate and a member of the jury that conferred on *The Cailiffs of Baghdad, Georgia* the 2011 Anisfield-Wolf Award for books that "make a significant contribution to our understanding of racism and our appreciation for the diversity of human cultures." You won't forget Theo Boykin, nor will you forget his friends the Cailiffs, especially Gladys, who tells this story with love and bewilderment, and the teacher, Miss Spivey, who changes all their lives.

How We Learn - Benedict Carey 2014-09-09

In the tradition of *The Power of Habit* and *Thinking, Fast and Slow* comes a practical, playful, and endlessly fascinating guide to what we really know about learning and memory today—and how we can apply it to our own lives. From an early age, it is drilled into our heads: Restlessness, distraction, and ignorance are the enemies of success. We're told that learning is all self-discipline, that we must confine ourselves to designated study areas, turn off the music, and maintain a strict ritual if we want to ace that test, memorize that presentation, or nail that piano recital. But what if almost everything we were told about learning is wrong? And what if there was a way to achieve more with less effort? In *How We Learn*, award-winning science reporter Benedict Carey sifts through decades of education research and landmark studies to uncover the truth about how our brains absorb and retain information. What he discovers is that, from the moment we are born, we are all learning quickly, efficiently, and automatically; but in our zeal to systematize the process we have ignored valuable, naturally enjoyable learning tools like forgetting, sleeping, and daydreaming. Is a dedicated desk in a quiet room really the best way to study? Can altering your routine improve your recall? Are there times when distraction is good? Is repetition necessary? Carey's search for answers to these questions yields a wealth of strategies that make learning more a part of our everyday lives—and less of a chore. By road testing many of the counterintuitive techniques described in this book, Carey shows how we can flex the neural muscles that make deep learning possible. Along the way he reveals why teachers should give final exams on the first day of class, why it's wise to interleave subjects and concepts when learning any new skill, and when it's smarter to stay up late prepping for that presentation than to rise early for one last cram session. And if this requires some suspension of disbelief, that's because the research defies what we've been told, throughout our lives, about how best to learn. The brain is not like a muscle, at least not in any straightforward sense. It is something else altogether, sensitive to mood, to timing, to circadian rhythms, as well as to location and environment. It doesn't take orders well, to put it mildly. If the brain is a learning machine, then it is an

eccentric one. In *How We Learn*, Benedict Carey shows us how to exploit its quirks to our advantage.

Straphanger - Taras Grescoe 2012-04-24

Taras Grescoe rides the rails all over the world and makes an elegant and impassioned case for the imminent end of car culture and the coming transportation revolution "I am proud to call myself a straphanger," writes Taras Grescoe. The perception of public transportation in America is often unflattering—a squalid last resort for those with one too many drunk-driving charges, too poor to afford insurance, or too decrepit to get behind the wheel of a car. Indeed, a century of auto-centric culture and city planning has left most of the country with public transportation that is underfunded, ill maintained, and ill conceived. But as the demand for petroleum is fast outpacing the world's supply, a revolution in transportation is under way. Grescoe explores the ascendance of the straphangers—the growing number of people who rely on public transportation to go about the business of their daily lives. On a journey that takes him around the world—from New York to Moscow, Paris, Copenhagen, Tokyo, Bogotá, Phoenix, Portland, Vancouver, and Philadelphia—Grescoe profiles public transportation here and abroad, highlighting the people and ideas that may help undo the damage that car-centric planning has done to our cities and create

convenient, affordable, and sustainable urban transportation—and better city living—for all.

Fascinating Mathematical People - Donald J. Albers 2011-09-06

Top mathematicians talk about their work and lives Fascinating Mathematical People is a collection of informal interviews and memoirs of sixteen prominent members of the mathematical community of the twentieth century, many still active. The candid portraits collected here demonstrate that while these men and women vary widely in terms of their backgrounds, life stories, and worldviews, they all share a deep and abiding sense of wonder about mathematics. Featured here—in their own words—are major research mathematicians whose cutting-edge discoveries have advanced the frontiers of the field, such as Lars Ahlfors, Mary Cartwright, Dusa McDuff, and Atle Selberg. Others are leading mathematicians who have also been highly influential as teachers and mentors, like Tom Apostol and Jean Taylor. Fern Hunt describes what it was like to be among the first black women to earn a PhD in mathematics. Harold Bacon made trips to Alcatraz to help a prisoner learn calculus. Thomas Banchoff, who first became interested in the fourth dimension while reading a Captain Marvel comic, relates his fascinating friendship with Salvador Dalí and their shared passion for art, mathematics, and the profound connection between the two. Other mathematical people found here are Leon Bankoff, who was also a Beverly Hills dentist; Arthur Benjamin, a part-time professional magician; and Joseph Gallian, a legendary mentor of future mathematicians, but also a world-renowned expert on the Beatles. This beautifully illustrated collection includes many photographs never before published, concise introductions by the editors to each person, and a foreword by Philip J. Davis.

The Willpower Instinct - Kelly McGonigal 2013-12-31

Based on Stanford University psychologist Kelly McGonigal's wildly popular course "The Science of Willpower," *The Willpower Instinct* is the first book to explain the science of self-control and how it can be harnessed to improve our health, happiness, and productivity. Informed by the latest research and combining cutting-edge insights from psychology, economics, neuroscience, and medicine, *The Willpower Instinct* explains exactly what willpower is, how it works, and why it matters. For example, readers will learn: • Willpower is a mind-body response, not a virtue. It is a biological function that can be improved through mindfulness, exercise, nutrition, and sleep. • Willpower is not an unlimited resource. Too much self-control can actually be bad for your health. • Temptation and stress hijack the brain's systems of self-control, but the brain can be trained for greater willpower • Guilt and shame over your setbacks lead to giving in again, but self-forgiveness and self-compassion boost self-control. • Giving up control is sometimes the only way to gain self-control. • Willpower failures are contagious—you can catch the desire to overspend or overeat from your friends—but you can also catch self-control from the right role models. In the groundbreaking tradition of *Getting Things Done*, *The Willpower Instinct* combines life-changing prescriptive advice and complementary exercises to help readers with goals ranging from losing weight to more patient parenting, less procrastination, better health, and greater productivity at work.

My Transportation For Life - Veer Savarkar 2021-01-19

The story is told. The curtain has been brought down on it. Two life-sentences have been run. And I have brought together my recollections of them within the cover of this book. They are narrated in brief and put together within the narrowest. When I came into this world, God sent me here possibly on a sort of life-sentence. It was the span of life allotted to me by time to stay in this 'prison-house of life'. This story is but a chapter of that book of life, which is a longer story not yet ended. You can finish reading the book in a day, while I had to live it for 14 long years of transportation. And if the story is so tiresome, unendurable and disgusting to you, how much must have been the living of it for me! Every moment of those 14 years in that jail has been an agony of the soul and the body to me, and to my fellow convicts in that jail. It was not only fatiguing, unbearable and futile to us all, it was equally or more excruciating to them as to me. And it is only that you may know it and feel the fatigue, the disgust and the pain of it as we have felt it, that I have chosen to write it for you. —Excerpts from this book This is the story of Swatantrayaveer Vinayak Damodar Savarkar—a great revolutionary, politician, poet and seer who tried to free India from the British yoke! British policy was to torture and persecute the political prisoners/revolutionaries so that they would reveal the names of all their colleagues or go mad or commit suicide. My Transportation for Life is a firsthand story of the sufferings and humiliation of an inmate of the infamous Cellular Jail of Andamans, the legendary Kala Paani. The physical tortures inside the high walls were made all the more insufferable by the sickening attitude of the men who mattered—the native leaders back home. This is a running commentary on the prevalent political conditions in India and a treatise for students of revolution. It is a burning story of all Tapasvis who were transported to Andaman.

Twelve Angry Men - Reginald Rose 2006-08-29

A landmark American drama that inspired a classic film and a Broadway revival—featuring an introduction by David Mamet A blistering character study and an examination of the American melting pot and the judicial system that keeps it in check, *Twelve Angry Men* holds at its core a deeply patriotic faith in the U.S. legal system. The play centers on Juror Eight, who is at first the sole holdout in an 11-1 guilty vote. Eight sets his sights not on proving the other jurors wrong but rather on getting them to look at the situation in a clear-eyed way not affected by their personal prejudices or biases. Reginald Rose deliberately and carefully peels away the layers of artifice from the men and allows a fuller picture to form of them—and of America, at its best and worst. After the critically

acclaimed teleplay aired in 1954, this landmark American drama went on to become a cinematic masterpiece in 1957 starring Henry Fonda, for which Rose wrote the adaptation. More recently, *Twelve Angry Men* had a successful, and award-winning, run on Broadway. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.
