The World of Beretta - Robert L Wilson
2015-11-10
Fabbrica d'Armi Pietro Beretta, S.p.A., the oldest

industrial firm and the oldest gunmaker in the world, launches its 475th anniversary with the publication of this lavish history and celebration of a unique world of Beretta firearms. Beretta remains under the stewardship of its founding family and reigns as one of the few international

brands symbolic of unsurpassed quality. Skyhorse Publishing is proud to publish a broad range of books for hunters and firearms enthusiasts. We publish books about shotguns, rifles, handguns, target shooting, gun collecting, self-defense, archery, ammunition, knives, gunsmithing, gun repair, and wilderness survival. We publish books on deer hunting, big game hunting, small game hunting, wing shooting, turkey hunting, deer stands, duck blinds, bowhunting, wing shooting, hunting dogs, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.

Quests of the Dragon and Bird Clan - Paul Kekai Manansala 2006-10-01

"Quests of the Dragon and Bird Clan" examines how the seafaring trading people known as the

"Nusantao" from Insular Southeast Asia influenced world history. This is a "blook," a book based on a weblog (blog). The decision to publish the book came after requests to make the information in the blog available in an easier-to-read and more portable format. The advantage of the printed work is that the blog entries are arranged in easy-to-manage chronological order without the need for the clicking through the blog archives. The glossary entries are also in alphabetical order for easy look-up, and a word index and table of contents further increase the readability of the blog/book. Important supplementary articles have also been included in the appendices. A must-read for those who think there is more to history than what we find in "mainstream" publications.

This book will help readers to understand the big picture, grasp the changing faces, and comprehend the local dynamics of regional security.

Design and Development of Heavy Duty Diesel Engines - P. A. Lakshminarayanan 2019-11-05

This book is intended to serve as a comprehensive reference on the design and development of diesel engines. It talks about combustion and gas exchange processes with important references to emissions and fuel consumption and descriptions of the design of various parts of an engine, its coolants and

lubricants, and emission control and optimization techniques. Some of the topics covered are turbocharging and supercharging, noise and vibrational control, emission and combustion control, and the future of heavy duty diesel engines. This volume will be of interest to researchers and professionals working in this area.

Walking the Way - John Dear 2021-07-17

"Our world of war, poverty, corporate greed, racism, sexism, nuclear weapons, and catastrophic climate change demonstrates the total failure of violence," says John Dear. The internationally known peace activist and Nobel Prize nominee has always offered a single answer: Jesus. Now he invites us to follow the nonviolent Jesus through the holy season of

Lent, beginning with Jesus' journey to Jerusalem and culminating in his resurrection and the new life of peace he brings to all. Deeply personal and uncompromisingly committed to peace, these prayerful reflections on Jesus' life and death challenge the notion that support of violence at any level is compatible with a life in Christ.

Drawing on the insights of Mahatma Gandhi, Martin Luther King, Jr., and others, Dear shows us how we can practice gospel nonviolence, be apostles of peace, and change the world. Perfect for personal reflection or small group discussion, these meditations invite us to "participate in our own inner disarmament and cultivate our true nonviolent nature" as we follow the Good Shepherd, the Lamb of God. A timely, important, and inspiring book for our times.

Wills, Trusts, and Estates - Jesse Dukeminier
2000

In this timely new edition, distinguished authors Dukeminier and Johanson build on the success of their phenomenally popular casebook *Wills, Trusts, and Estates* with new coverage of non-traditional family arrangements, living wills, and much more. The authors blend cases selected for human interest as well as teaching value with provocative hypotheticals, cartoons, photographs, and other illustrations to comprehensively cover this area in a very lively, readable manner. Organized logically, The book begins with estate planning and its limitations, moves to wills and will substitutes, progresses to trusts, and concludes with a chapter on taxation. New topic coverage includes: babies inadvertently swapped in hospitals, surrogate mothers, lesbian adoption, and artificial insemination (including children conceived after

sperm donor's death) living wills and powers of attorney for health care, including the Cruzan case And The Uniform Health Care Decisions Act a new chapter combining mental capacity and undue influence, which features the Seward Johnson will contest and related preventive lawyering issues shortened, more teachable chapters on future interests and perpetuities latest changes To The Uniform Probate Code a completely revised and reorganized trustee administration chapter Like its predecessors, this book is a lively, flexible, and understandable teaching tool that is accompanied by a detailed and witty Teacher's Manual, which is regarded as the best in the field.

The Art of Mediation - Mark D. Bennett

2005-12-08

This workbook is designed for basic mediation training. Authors Scott Hughes, Mark Bennett, and Michele Hermann take NITA's performance-based training for trial lawyers and adapt it to training for mediators. The authors have used these materials extensively in their mediation training classes at law schools and in programs open to the public. The Art of Mediation, Second Edition, sets the mediation process in context, provides basic definitions, contrasts mediation with other forms of dispute resolution, describes varieties of mediation, and lays out roles and functions of the mediators. The book contains forms that illustrate sample agreements to mediate and final mediation agreements, plus a section containing hypothetical situations for

performance training. Reviews "I have used the first edition of The Art of Mediation in my classes for almost a decade and I definitely intend to use the Second Edition in the future. Students like the book because it is so practical and easy to read. I like it because it presents a variety of perspectives so that students learn that there is no one right or easy way to mediate." — John Lande, Associate Professor and Director, LL.M. Program in Dispute Resolution, University of Missouri-Columbia School of Law Columbia

Drosophila - Therese A. Markow 2005-11-01

Anyone wishing to tap the research potential of the hundreds of Drosophila species in addition to D.melanogaster will finally have a single comprehensive resource for identifying, rearing and using this diverse group of insects. This is the only group of higher eukaryotes for which the genomes of 12 species have been sequenced. The fruitfly Drosophila melanogaster continues to be one of the greatest sources of information

regarding the principles of heredity that apply to all animals, including humans. In reality, however, over a thousand different species of *Drosophila* exist, each with the potential to make their own unique contributions to the rapidly changing fields of genetics and evolution. This book, by providing basic information on how to identify and breed these other fruitflies, will allow investigators to take advantage, on a large scale, of the valuable qualities of these other *Drosophila* species and their newly developed genomic resources to address critical scientific questions. * Provides easy to use keys and illustrations to identify different *Drosophila* species * A guide to the life history differences of hundreds of species * Worldwide distribution maps of hundreds of species * Complete recipes for different *Drosophila* diets * Offers an analysis on how to account for species differences in designing and conducting experiments * Presents useful ideas of how to collect the many different *Drosophila* species in the wild

Programming and Automating Cisco Networks -
Ryan Tischer 2016-09-09

Improve operations and agility in any data center, campus, LAN, or WAN Today, the best way to stay in control of your network is to address devices programmatically and automate network interactions. In this book, Cisco experts Ryan Tischer and Jason Gooley show you how to do just that. You'll learn how to use programmability and automation to solve business problems, reduce costs, promote agility and innovation, handle accelerating complexity, and add value in any data center, campus, LAN, or WAN. The authors show you how to create production solutions that run on or interact with

Nexus NX-OS-based switches, Cisco ACI, Campus, and WAN technologies. You'll learn how to use advanced Cisco tools together with industry-standard languages and platforms, including Python, JSON, and Linux. The authors demonstrate how to support dynamic application environments, tighten links between apps and infrastructure, and make DevOps work better. This book will be an indispensable resource for network and cloud designers, architects, DevOps engineers, security specialists, and every professional who wants to build or operate high-efficiency networks. Drive more value through programmability and automation, freeing resources for high-value innovation Move beyond error-prone, box-by-box network management Bridge management gaps arising from current operational models Write NX-OS software to run on, access, or extend your Nexus switch Master Cisco's powerful on-box automation and operation tools Manage complex WANs with NetConf/Yang, ConfD, and Cisco

A Patriot's History of the United States - Larry Schweikart 2004-12-29

For the past three decades, many history professors have allowed their biases to distort the way America's past is taught. These intellectuals have searched for instances of racism, sexism, and bigotry in our history while downplaying the greatness of America's patriots and the achievements of "dead white men." As a

result, more emphasis is placed on Harriet Tubman than on George Washington; more about the internment of Japanese Americans during World War II than about D-Day or Iwo Jima; more on the dangers we faced from Joseph McCarthy than those we faced from Josef Stalin. A Patriot's History of the United States corrects those doctrinaire biases. In this groundbreaking book, America's discovery, founding, and development are reexamined with an appreciation for the elements of public virtue, personal liberty, and private property that make this nation uniquely successful. This book offers a long-overdue acknowledgment of America's true and proud history.

Pounder's Marine Diesel Engines and Gas Turbines - Malcolm Latache 2020-12-01
Pounder's Marine Diesel Engines and Gas Turbines, Tenth Edition, gives engineering cadets, marine engineers, ship operators and managers insights into currently available engines and auxiliary equipment and trends for

the future. This new edition introduces new engine models that will be most commonly installed in ships over the next decade, as well as the latest legislation and pollutant emissions procedures. Since publication of the last edition in 2009, a number of emission control areas (ECAs) have been established by the International Maritime Organization (IMO) in which exhaust emissions are subject to even more stringent controls. In addition, there are now rules that affect new ships and their emission of CO2 measured as a product of cargo carried. Provides the latest emission control technologies, such as SCR and water scrubbers Contains complete updates of legislation and pollutant emission procedures Includes the latest emission control technologies and expands upon remote monitoring and control of engines [U.S. Navy Air Traffic Controller NAVEDTRA 14342](#) - Presents an overview of the AC rating to include aviation weather; air navigation and aids to air

navigation; military aircraft characteristics and performance; airport lighting, markings, and equipment; air traffic control equipment; airspace classification; flight assistance services; general flight rules and IFR/SVFR control procedures; control tower operations; radar operations; shipboard operations; and facility operations. Reviews air traffic control operator technical knowledge with emphasis on technical knowledge associated with supervisory performance such as air traffic control training certification, plans, reports, flight inspections, and required resources as well as aircraft accidents and incidents.

Health is Academic - Eva Marx 1998

With expert contributions from over 70 leading professional associations, Health is Academic covers the "eight components" designed to support students and help them acquire the knowledge and skills they need to deal with the problems they face in and out of school. The text authoritatively discusses: Comprehensive School

Health Education; Physical Education; School Health Services; Nutrition Services; Counseling, Psychological, and Social Services; Healthy School Environment; School-Site Health Promotion for Staff; and Family/Community Involvement.

Research Methods for Political Science - David E. McNabb 2020-12-31

The third edition of Research Methods for Political Science retains its effective approach to helping students learn what to research, why to research and how to research. The text integrates both quantitative and qualitative approaches to research in one volume and covers such important topics as research design, specifying research problems, designing questionnaires and writing questions, designing and carrying out qualitative research and analyzing both quantitative and qualitative

research data. Heavily illustrated, classroom tested, exceptionally readable and engaging, the text presents statistical methods in a conversational tone to help students surmount "math phobia." Updates to this new edition include: Research topics chapters have been upgraded and expanded. Two mixed methods design chapters have been added. A new chapter on hermeneutic analysis designs and research with large data sets. The chapter on multivariate statistics has been expanded, with an expanded discussion on logistic regression. Tools on how to prepare and present research findings are now featured in the appendix, allowing instructors more flexibility when teaching their courses. Research Methods for Political Science will give students the confidence and knowledge they need to understand the methods and basics skills for data collection, presentation and analysis.

Serious Games in Personalized Learning -
Scott M. Martin 2021-07-13

Serious Games in Personalized Learning investigates game-based teaching and learning at a time when learning and training systems are increasingly integrating serious games, machine-learning artificial intelligence models, and adaptive technologies. Game-based education provides rare data for measuring, assessing, and evaluating not just a game's effectiveness but the acquisition of information and knowledge that a student may gain through playing a learning game. This book synthesizes contemporary research, frameworks, and models centered on the design and delivery of serious games that truly personalize the learning experience. Scholars of educational technology, instructional design, human performance, and more will find a comprehensive guide to the history, practical implications, and data-collection potential inherent to these fast-evolving tools.
