Ndtv Frauds - Sree Iyer 2017-03-07  
This book is a classic example of how media organizations misuse, violate laws in connivance with crony capitalists, pliant law firms and politicians to amass personal wealth. This is a narrative of how two Promoters of NDTV along with key top management colluded over the years with government functionaries and politicians to break laws, evade taxes and deceive shareholders of a public listed company. All this obviously through political patronage and "wheeling-and-dealing" as part of the Lutyens club and how they created a biased public discourse for a select elite class. In the minds of the Indian citizen, there is a space and respect for media. Using the halo of journalism and under the garb of Freedom of Press, media owners misuse their position and in the end, degrade the values of journalism. On several occasions media became the tool of false propaganda, blackmailing and illegal money making with the blessing of uncouth politicians and corporate icons with hidden agendas. This ought to be exposed and that is the reason for this book.

**Rebuilding the State Institutions** - Juan Antonio Le Clercq 2019-11-29

Contemporary Mexico faces a complex crisis of violence and insecurity with high levels of impunity and the lack of an effective rule of law. These weaknesses in the rule of law are multidimensional and involve elements of institutional design, the specific content of the laws, particularities of political competition and a culture of legality in a country with severe social inequalities. This book discusses necessary institutional and legal reforms to develop the rule of law in a context of democratic, social and economic transformations. The chapters are organized to address: 1) The concept of the 'rule of law' and its measurement; 2) The fragility of the 'rule of law' in Mexico; 3) Structural reforms and implementation challenges; 4) Social exclusion and the culture of legality. The book addresses decision-makers, civil servants, consultants, scholars, lecturers, and students focusing on public policy, rule of law, sociology of law, legislative studies and practice, impunity, and areas of political philosophy. • The book presents an interdisciplinary and integrated approach for understanding the rule of law in Mexico, taking into account national particularities, the regional context and global comparisons. • Chapters discuss recent institutional reforms in Mexico from a critical point of view and explore possible next steps to achieve effective implementation. • This book addresses the links between a weak rule of law and social phenomena like insecurity, violence, corruption and democratic deficits.

**Antistatic Sprays** - National Aeronautics and Space Adm Nasa 2018-10-25

Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center
