Theoretical Models of Counseling and Psychotherapy - Kevin A. Fall 2011-01-19

This text provides a comprehensive overview of a variety of major counseling theories and focuses on the integration of different theoretical models. Appropriate for advanced undergraduates and graduate students, it offers a detailed description of the philosophical basis for each theory, along with historical context and a biography of the founder. Each chapter follows a similar format and explores the main features of the theory, including its approach to and ideas on personality development, human nature, the role of environment, the change process in therapy, and contributions and limitations to the mental health field. Theory-specific information on diagnosis, psychopharmacology, multicultural issues, spirituality, and gender issues is also discussed. These features will provide students with a deeper and more complete understanding of counseling theory than is available in any single resource and allow them to easily bridge classroom study to their future practice. This second edition of the text has been completely updated and includes more case examples, as well as a new chapter on Constructivist approaches. An online instructor's manual with student resources is available and offers material to enhance the pedagogical features of the text.

From the Clarinet D'Amour to the Contra Bass - Albert R. Rice 2009-03-31

Following his much-acclaimed *The Baroque Clarinet* and *The Clarinet in the Classical Period*, Albert R. Rice now turns his signature detailed attention to large clarinets - the clarinet d'amour, the basset horn, the alto clarinet, bass and contra bass clarinets. Each chapter is devoted to a specific instrument, and offers a fascinating insider's look at its defining characteristics, a comprehensive history of its evolution, meticulously-researched information on its makers and aspects of construction, and a thorough discussion of its music. Rice illustrates how the introduction of large clarinets into chamber ensembles, wind bands, and opera orchestras was the result of experiments meant to address specific musical needs. Along the way, he brings to life the musicians, virtuosi, soloists, and orchestral and band musicians, as well as the instruments' makers and the composers from J. C. Bach to Smetana who wrote for them. Based on careful study of primary sources - musical compositions, patents, memoirs and diaries, and unfettered access to historical instruments themselves--Rice's expert presentation is nothing short of exhaustive. From the Clarinet d'Amour to the Contrabass will engage all who love the clarinet and its music.

Networked Governance of Freedom and Tyranny - John Braithwaite 2012-03-01

This book offers a new approach to the extraordinary story of Timor-Leste. The Indonesian invasion of the former Portuguese colony in 1975 was widely considered to have permanently crushed the Timorese independence movement. Initial international condemnation of the invasion was quickly replaced by widespread acceptance of Indonesian sovereignty. But inside Timor-Leste various resistance networks maintained their struggle, against all odds. Twenty-four years later, the Timorese were allowed to choose their political future and the new country of Timor-Leste came into being in 2002. This book presents freedom in Timor-Leste as an accomplishment of networked governance, arguing that weak networks are capable of controlling strong tyrannies. Yet, as events in Timor-Leste since independence show, the nodes of networks of freedom can themselves become nodes of tyranny. The authors argue that constant renewal of liberation networks is critical for peace with justice - feminist networks for the liberation of women, preventive diplomacy networks for liberation of victims of war, village development networks, civil society networks. Constant renewal of the separation of powers is also necessary. A case is made for a different

way of seeing the separation of powers as constitutive of the republican ideal of freedom as non-domination. The book is also a critique of realism as a theory of international affairs and of the limits of reforming tyranny through the centralised agency of a state sovereign. Reversal of Indonesia's 1975 invasion of Timor-Leste was an implausible accomplishment. Among the things that achieved it was principled engagement with Indonesia and its democracy movement by the Timor resistance. Unprincipled engagement by Australia and the United States in particular allowed the 1975 invasion to occur. The book argues that when the international community regulates tyranny responsively, with principled engagement, there is hope for a domestic politics of nonviolent transformation for freedom and justice.

How History Gets Things Wrong - Alex Rosenberg 2019-08-13

Why we learn the wrong things from narrative history, and how our love for stories is hard-wired. To understand something, you need to know its history. Right? Wrong, says Alex Rosenberg in *How History Gets Things Wrong*. Feeling especially well-informed after reading a book of popular history on the best-seller list? Don't. Narrative history is always, always wrong. It's not just incomplete or inaccurate but deeply wrong, as wrong as Ptolemaic astronomy. We no longer believe that the earth is the center of the universe. Why do we still believe in historical narrative? Our attachment to history as a vehicle for understanding has a long Darwinian pedigree and a genetic basis. Our love of stories is hard-wired. Neuroscience reveals that human evolution shaped a tool useful for survival into a defective theory of human nature. Stories historians tell, Rosenberg continues, are not only wrong but harmful. Israel and Palestine, for example, have dueling narratives of dispossession that prevent one side from compromising with the other. Henry Kissinger applied lessons drawn from the Congress of Vienna to American foreign policy with disastrous results. Human evolution improved primate mind reading—the ability to anticipate the behavior of others, whether predators, prey, or cooperators—to get us to the top of the African food chain. Now, however, this hard-wired capacity makes us think we can understand history—what the Kaiser was thinking in 1914, why Hitler declared war on the United States—by uncovering the narratives of what happened and why. In fact, Rosenberg argues, we will only understand history if we don't make it into a story.

The Sexual Murderer - Eric Beauregard 2016-10-04

Sexual homicide continues to be one of the most widely reported and sensationalised forms of murder, attracting fascination from the public and scholars alike. Despite this continued interest, few empirical studies have been conducted on this particular form of sexual crime. *The Sexual Murderer* provides an analytical review of the state of knowledge on the sexual murderer and his offense, and presents new data

that confronts some of the accepted ideas and myths surrounding this type of homicide. The authors draw on original data stemming from both offenders and the police to present an exhaustive and accurate picture of the sexual murderer and his offense, and compare the sex offenders who do kill with sex offenders who, despite being very violent, do not. Each chapter includes a section on the practical implications of the findings, and what the findings mean for professionals working with these cases and for the criminal justice system. This book explores themes including the role of fantasies, paraphilias, and personality; criminal career; context of the crime; journey to murder; modus operandi and crime scene; sex trade workers; avoiding detection; body disposal pathways; and whether we can predict sexual homicide occurrence. This book is a comprehensive resource for academic and professionals involved in sexual homicide cases, such as psychologists, psychiatrists, investigators and profilers, as well as individuals working in the field of sexual violence. This book will also be of interest to students taking courses on homicide, sexual homicide, and serial homicide.

Movements in Organizational Communication Research - Jamie McDonald 2019-03-15

Movements in Organizational Communication Research is an essential resource for anyone wishing to become familiar with the current state of organizational communication research and key trends in the field. Seasoned organizational communication scholars will find that the book provides unique insights by way of the intergenerational dialogue that is found in the book, as well as the contributors' stories about their scholarly trajectories. Those who are new to the field will find that the book enables them to familiarize themselves with the field and become a part of the organizational communication scholarly community in an inviting and accessible way. Key features of the book include: A review of current issues and future directions in 13 topical areas of organizational communication research. Intergenerational dialogue and collaboration between both established and emerging scholars in their specialty areas. Reflections by the authors on their scholarly trajectories and how they became a part of the field. Discussion questions at the end of each chapter that prompt reflections and debate. The book also features online resources for instructors: Sample course syllabus Suggested case studies from the book Cases in Organization and Managerial Communication to align with this book's chapters The book is recommended as the anchor text for introductory graduate-level courses and upper-level undergraduate courses in organizational communication. It is also an excellent supplementary text for advanced doctoral-level courses in organizational communication, and courses in related fields such as organization studies, organizational behavior, and management.

Discrimination and Disparities - Thomas Sowell 2019-03-05

An enlarged edition of Thomas Sowell's brilliant examination of the origins of economic disparities. Economic and other outcomes differ vastly among individuals, groups, and nations. Many explanations have been offered for the differences. Some believe that those with less fortunate outcomes are victims of genetics. Others believe that those who are less fortunate are victims of the more fortunate. *Discrimination and Disparities* gathers a wide array of empirical evidence to challenge the idea that different economic outcomes can be explained by any one factor, be it discrimination, exploitation, or genetics. This revised and enlarged edition also analyzes the human consequences of the prevailing social vision of these disparities and the policies based on that vision--from educational disasters to widespread crime and violence.

The Self Psychology of Addiction and its Treatment - Richard B. Ulman 2013-04-03

In the time of Freud, the typical psychoanalytic patient was afflicted with neurotic disorders; however, the modern-day psychotherapy patient often suffers instead from a variety of addictive disorders. As the treatment of neurotic disorders based on unconscious conflicts cannot be applied to treatment of addictive disorders, psychoanalysis has been unable to keep pace with the changes in the type of patient seeking help. To address the shift and respond to contemporary patients' needs, Ulman and Paul present a thorough discussion of addiction that studies and analyzes treatment options. Their honest and unique work provides new ideas that will help gain access to the fantasy worlds of addicted patients. *The Self Psychology of Addiction and Its Treatment* emphasizes clinical approaches in the treatment of challenging narcissistic patients struggling with the five major forms of addiction. Ulman and Paul focus on six specific case studies that are illustrative of the five forms of addiction. They use the representative subjects to develop a self

psychological model that helps to answer the pertinent questions regarding the origins and pathway of addiction. This comprehensive book links addiction and trauma in an original manner that creates a greater understanding of addiction and its foundations than any clinical or theoretical model to date.

The Cambridge Encyclopedia of Brass Instruments - Trevor Herbert 2019-09-19

Some thirty-two experts from fifteen countries join three of the world's leading authorities on the design, manufacture, performance and history of brass musical instruments in this first major encyclopaedia on the subject. It includes over one hundred illustrations, and gives attention to every brass instrument which has been regularly used, with information about the way they are played, the uses to which they have been put, and the importance they have had in classical music, sacred rituals, popular music, jazz, brass bands and the bands of the military. There are specialist entries covering every inhabited region of the globe and essays on the methods that experts have used to study and understand brass instruments. The encyclopaedia spans the entire period from antiquity to modern times, with new and unfamiliar material that takes advantage of the latest research. From Abblasen to Zorsi Trombetta da Modon, this is the definitive guide for students, academics, musicians and music lovers.

Give Sorrow Words - John H. Harvey 2016-03-23

Throughout our lives, we are influenced by the sensation of loss. Whether implicit or obvious, the impact of this sense of loss affects our daily thinking and behavior. This new text provides a comprehensive introduction to the study of loss via exploration into three major types of loss: loss of important relationships (divorce or perhaps the dissolution of important relationships and friendships); losses that damage who we are, our self-esteem (loss of employment); and losses resulting from victimization (being the target of violence or prejudice; loss of home in a natural disaster). Students of sociology, theology, and family studies will find this text of key interest. Moreover, professionals in these fields, including the fields of trauma and loss, will appreciate the thorough literature review, practical language, clinical interventions, and case highlights.

Uneven Encounters - Micol Seigel 2010-07-01

In *Uneven Encounters*, Micol Seigel chronicles the exchange of popular culture between Brazil and the United States in the years between the World Wars, and demonstrates how that exchange affected ideas of race and nation in both countries. From Americans interpreting advertisements for Brazilian coffee or dancing the Brazilian maxixe, to Rio musicians embracing the "foreign" qualities of jazz, Seigel traces a lively, cultural back and forth. Along the way, she shows how race and nation for both elites and non-elites are constructed together, and driven by global cultural and intellectual currents as well as local, regional, and national ones. Seigel explores the circulation of images of Brazilian coffee and of maxixe in the United States during the period just after the imperial expansions of the early twentieth century. Exoticist interpretations structured North Americans' paradoxical sense of themselves as productive "consumer citizens." Some people, however, could not simply assume the privileges of citizenship. In their struggles against racism, Afro-descended citizens living in Rio de Janeiro, São Paulo, New York, and Chicago encountered images and notions of each other, and found them useful. Seigel introduces readers to cosmopolitan Afro-Brazilians and African Americans who rarely traveled far from home but who nonetheless absorbed ideas from abroad. She suggests that studies comparing U.S. and Brazilian racial identities as two distinct constructions are misconceived. Racial formation transcends national borders; attempts to understand it must do the same.

The Radio Station - John Allen Hendricks 2018-05-01

The Radio Station offers a concise and insightful guide to all aspects of radio broadcasting, streaming, and podcasting. This book's tenth edition continues its long tradition of guiding readers to a solid understanding of who does what, when, and why in a professionally managed station. This new edition explains what "radio" in America has been, where it is today, and where it is going, covering the basics of how programming is produced, financed, delivered and promoted via terrestrial and satellite broadcasting, streaming and podcasting, John Allen Hendricks and Bruce Mims examine radio and its future within a framework of existing and emerging technologies. The companion website is new revised with content for instructors, including an instructors' manual and test questions. Students will discover an expanded library of audio interviews with leading industry professionals in addition to practice quizzes and links to additional

resources.

The Business of Platforms - Michael A. Cusumano 2019-05-07

A trio of experts on high-tech business strategy and innovation reveal the principles that have made platform businesses the most valuable firms in the world and the first trillion-dollar companies. Managers and entrepreneurs in the digital era must learn to live in two worlds—the conventional economy and the platform economy. Platforms that operate for business purposes usually exist at the level of an industry or ecosystem, bringing together individuals and organizations so they can innovate and interact in ways not otherwise possible. Platforms create economic value far beyond what we see in conventional companies. *The Business of Platforms* is an invaluable, in-depth look at platform strategy and digital innovation. Cusumano, Gawer, and Yoffie address how a small number of companies have come to exert extraordinary influence over every dimension of our personal, professional, and political lives. They explain how these new entities differ from the powerful corporations of the past. They also question whether there are limits to the market dominance and expansion of these digital juggernauts. Finally, they discuss the role governments should play in rethinking data privacy laws, antitrust, and other regulations that could reign in abuses from these powerful businesses. Their goal is to help managers and entrepreneurs build platform businesses that can stand the test of time and win their share of battles with both digital and conventional competitors. As experts who have studied and worked with these firms for some thirty years, this book is the most authoritative and timely investigation yet of the powerful economic and technological forces that make platform businesses, from Amazon and Apple to Microsoft, Facebook, and Google—all dominant players in shaping the global economy, the future of work, and the political world we now face.

The Influence of Computers and Informatics on Mathematics and Its Teaching - R. F. Churchhouse 1986-01-31

First published in 1986, the first ICMI study is concerned with the influence of computers and computer science on mathematics and its teaching in the last years of school and at tertiary level. In particular, it explores the way the computer has influenced mathematics itself and the way in which mathematicians work, likely influences on the curriculum of high-school and undergraduate students, and the way in which the computer can be used to improve mathematics teaching and learning. The book comprises a report of the meeting held in Strasbourg in March 1985, plus several papers contributed to that meeting.

Voluntary Environmental Agreements - Patrick ten Brink 2017-08-25

Voluntary environmental agreements (VEAs) – generally agreements between government and business – have been regarded by many as a key new instrument for meeting environmental objectives in a flexible manner. Their performance to date has, however, also led to considerable criticism, with several parties arguing that they are methods for avoiding real action that goes beyond "business-as-usual". Is either of these positions justified? The aim of this book is to highlight and learn the lessons from existing experience, looking not just at results but also at specific elements of agreements and also at the process of the agreement itself. Lessons are drawn from experience from across the world, covering the full range of environmental challenges, and from the perspective of key stakeholder groups. Importantly, the book also presents tools for assessing and improving existing agreements and includes recommendations and guidelines for future agreements in key areas such as climate change. It also deals at length with the problem of how such agreements might be used in developing and transitional economies. The overall view of the book is that there is a real potential for the future use of VEAs as part of the policy mix and as a tool for sharing the responsibility for meeting environmental objectives. For the agreements to play this role, however, significant steps are needed to ensure that they are effective, efficient, equitable and appropriately linked to a portfolio of other instruments. The book is divided into four sections. First, existing agreements, their development and efficacy are considered; second, the prospects for voluntary agreements in developing and transitional economies are discussed; third, a range of authors examine the role of VEAs as part of the policy mix to combat climate change; and, finally, the book concludes with an examination of how new tools for evaluating and improving VEAs could be utilized in the future. Voluntary Environmental Agreements will be of interest not only to academics, governments and businesses wishing

to understand this specific instrument, but also to those already implementing or considering applying VEAs to meet their environmental objectives.

Early Childhood Teacher Research - Kathryn Castle 2020-10-13

In this fully revised and updated second edition, *Early Childhood Teacher Research* addresses the questions and concerns that pre- and in-service teachers of young children frequently have when engaging in teacher research. Accessible and interactive, this book explores the important issues every early childhood teacher should know, guiding readers from conceptualization, generating research questions, identifying data sources, gathering and analyzing data, interpreting and sharing results, to taking action. This second edition features thoroughly updated references, standards, and resources, as well as all-new sections on teacher advocacy, social media and devices, data collection, and planned versus unplanned research. Each chapter features: Teacher Researcher Notebook prompts for the reader to record ideas for research questions and to develop a plan for doing research. "From the Field" vignettes providing rich examples of real-world early childhood teacher researchers and their perspectives on doing teacher research. Reflection prompts inviting readers to pause and think deeply about relating content to their own situations. Reflections can be recorded in the Teacher Researcher Notebook. Explorations of additional content, websites, resources, interviews, and activities.

Notes from the Rainforest - George Faludy 1988

Notes from the Rainforest is the diary of two months spent in a cabin on Vancouver Island. The diary consists of entries written at night in the silence of the forest. The entries – absorbing, provocative, playful, and profound – range from philosophical aphorisms to acid comments on the state of communism today, the excesses of the American way of life, the characteristics of Canadian culture, and the vagaries of history and human nature.

The EBCOG Postgraduate Textbook of Obstetrics & Gynaecology - Tahir Mahmood 2021-10-31

This authoritative textbook provides a much-needed guide for postgraduate trainees preparing for the European Board and College of Obstetrics and Gynaecology (EBCOG) Fellowship examination. Published in association with EBCOG, it fully addresses the competencies defined by the EBCOG curriculum and builds the clinical practice related to these competencies upon the basic science foundations. Volume 1 covers the depth and breadth of obstetrics, and draws on the specialist knowledge of four highly experienced Editors and over 100 contributors from across Europe, reflecting the high-quality training needed to ensure the safety and quality of healthcare for women and their babies. It incorporates key international guidelines throughout, along with colour diagrams and photographs for easy understanding. This is an invaluable resource, not only for postgraduate trainees planning to sit the EFOG examination, but also for practising specialists looking to update their knowledge and skills to meet the ever-evolving complexity of clinical practice.

The Book Publishing Industry - Albert N. Greco 2005

The Book Publishing Industry focuses on consumer books (adult, juvenile, and mass market paperbacks) and reviews all major book categories to present a comprehensive overview of this diverse business. In addition to the insights and portrayals of the U.S. publishing industry, this book includes an appendix containing historical data on the industry from 1946 to the end of the twentieth century. The selective

bibliography includes the latest literature, including works in marketing and economics that has a direct relationship with this dynamic industry. This third edition features a chapter on e-books and provides an overview of the current shift toward digital media in the US book publishing industry.

The Language Of Environment - George Myerson 2014-03-05

First published in 1996. "Environment" challenges modern knowledge and its institutions: academic disciplines, research groups, journals and presses, syllabuses and texts, professions and data banks, media experts and policy advisors. The language of environment makes no policy proposals, it is not prescriptive. But it is an attempt to think about the cultural context of all proposals and prescriptions, the cultures of authority and expertise in our time. How is knowledge made to count, and how do all the different claims connect, or collide?

Best Practices in Data Cleaning - Jason W. Osborne 2013

Many researchers jump straight from data collection to data analysis without realizing how analyses and hypothesis tests can go profoundly wrong without clean data. This book provides a clear, step-by-step process of examining and cleaning data in order to decrease error rates and increase both the power and replicability of results. Jason W. Osborne, author of *Best Practices in Quantitative Methods* (SAGE, 2008) provides easily-implemented suggestions that are research-based and will motivate change in practice by empirically demonstrating, for each topic, the benefits of following best practices and the potential consequences of not following these guidelines. If your goal is to do the best research you can do, draw conclusions that are most likely to be accurate representations of the population(s) you wish to speak about, and report results that are most likely to be replicated by other researchers, then this basic guidebook will be indispensable.

Food and Language - Kathleen C. Riley 2018-08-22

Food and Language: Discourses and Foodways across Cultures explores in innovative ways how food and language are intertwined across cultures and social settings. How do we talk about food? How do we interact in its presence? How do we use food to communicate? And how does social interaction feed us? The book assumes no previous linguistic or anthropological knowledge but provides readers with the understanding to pursue further research on the subject. With a full glossary at the end of the book and additional tools hosted on an eResources page (such as recommended web and video links and some suggested research exercises), this book serves as an ideal introduction for courses on food, language, and food-and-language in anthropology departments, linguistics departments, and across the humanities and social sciences. It will also appeal to any reader interested in the semiotic interplay between food and language.

Exporting the American Gospel - Steve Brouwer 2013-12-16

As the pressures of globalization are crushing local traditions, millions of uprooted people are buying into a new American salvation product. This fundamentalist Christianity, a fusion of American popular religion and politics, is one of the most significant cultural influences exported from the United States. With illuminating case studies based on extensive field research, *Exporting the American Gospel* demonstrates how Christian fundamentalism has taken hold in many nations in Africa, Latin America and Asia.

Arsenic in Groundwater - M. Manzurul Hassan 2018-03-08

Arsenic-contaminated groundwater is considered one of the world's largest environmental health crises, as more than 300 million people in more than one-third of countries worldwide are at risk of groundwater arsenic poisoning. This book addresses how arsenic in groundwater impacts human health by using the frameworks of natural sciences, social sciences, and health sciences in the context set by environmental

and legal considerations. *Arsenic in Groundwater: Poisoning and Risk Assessment* examines the spatial, quantitative, and qualitative aspects on arsenic poisoning; for instance, using geographical information systems (GIS) to investigate the spatial discontinuity of arsenic-laced water in spatial and temporal dimensions to uncover patterns of variations over scales from meters to kilometers. Spatial risk mapping provides insight for academics, researchers, policy makers, and politicians on possible long-term strategies for arsenic mitigation. Qualitative methodological approaches uncover the hidden issues of arsenic poisoning on human health and the related social implications. The book also examines legal aspects, such as the right to safe drinking water, as well as an in-depth look at how community participation can shape public policy. Features: Describes arsenic poisoning from both the scientific and social science perspectives Includes technical insights drawn from GIS-based modeling for spatial arsenic discontinuity and spatial health risks of arsenic poisoning Provides a state-of-the-art review of the human health literature and cutting-edge scientific evidence for arsenic-related health and social implications Examines the environmental justice and legal issues of drinking water and its quality Presents environmental policy and public mitigation strategies with Public Participation GIS (PPGIS) related to arsenic contamination More than 2,000 references serve as valuable resources for various aspects of arsenic poisoning

Nutrition and Eye Health - John Lawrenson 2020-01-03

Blindness and visual impairment impact significantly on an individual's physical and mental well-being. Loss of vision is a global health problem, with approximately 250 million of the world's population currently living with vision loss, of which 36 million are classified as blind. Visual impairment is more frequent in the elderly, with cataract and age-related macular degeneration (AMD) accounting for over 50% of cases globally. Oxidative stress has been strongly implicated in the pathogenesis of both conditions, and consequently the role of nutritional factors, in particular carotenoids and micronutrient antioxidants, have been investigated as possible preventative or therapeutic strategies. Dry eye syndrome (DES) is one of the most common ophthalmic conditions in the world. DES occurs where the eye does not produce enough tears and/or the tears evaporate too quickly leading to discomfort and varying degrees of visual disturbance. There has recently been a great deal of interest in the potential for oral or topical supplementation with essential fatty acids (EFAs), specifically omega-3 and omega-6 fatty acids, as an adjunct to conventional treatments for DES. The objective of this Special Issue on 'Nutrition and Eye Health' is to publish papers describing the role of nutrition in maintaining eye health and the use of nutritional interventions to prevent or treat ocular disease. A particular (but not exclusive) emphasis will be on papers (reviews and/or clinical or experimental studies) relating to cataract, AMD and DES.

The Problem of Freedom - Thomas C. Holt 1992

"A spirited and absorbing history of emancipation, oppression, and rebellion in the British empire." -- C. Vann Woodward. "Holt greatly extends and deepens our understanding of the emancipation experience when, for just over a century, the people of Jamaica struggled to achieve their own vision of freedom and autonomy against powerful conservative forces." -- David Barry Gaspar.

Operationalizing integrated landscape approaches in the tropics - Reed, J. 2020-10-29

Poverty, food insecurity, biodiversity and habitat loss are persistent global challenges that are further exacerbated by the impacts of climate change. These challenges are particularly hard felt in the tropical landscapes of the global South where tensions between local socio-economic and international environmental commitments are pervasive. Due to the apparent failure of sectorial approaches to address such challenges, more holistic strategies are being increasingly promoted. Integrated landscape approaches are one such example; essentially a governance strategy that engages multiple stakeholders to reconcile societal and environmental objectives at the landscape scale to identify trade-offs and potential synergies for more sustainable and equitable land management. Integrated landscape approaches have been widely endorsed in the international and national policy arena, within academia, and in the discourse surrounding conservation and development funding. However, despite strong scientific theories and concepts, the implementation, and particularly evaluation and reporting, of integrated landscape approaches in the tropics remains poorly developed. The COLANDS initiative represents an explicit attempt to contribute towards the evidence base by operationalizing integrated landscape approaches in Ghana, Zambia and Indonesia. In this regard we aim to provide regular, honest reporting of progress. This book

details the experiences of researchers engaged in these landscape-scale initiatives across the first two years of implementation. With dedicated chapters on current progress, biodiversity, methods and evaluation the book provides useful tools and resources for research and implementation. Furthermore, we consider the complex socio-political challenges associated with landscape approaches with chapters focussed on how to effectively engaging stakeholders and understanding the national policy environment. We then provide profiles of the sites in each of the three countries and describe the historical context, current status and potential for more integrated landscape governance. This book explores the techniques and strategies that can be deployed to improve the governance and management of land and natural resources and better reconcile conservation and development objectives in tropical landscapes undergoing rapid change.
