Outliers - Malcolm Gladwell 2008-11-18

From the bestselling author of *Blink* and *The Tipping Point*, Malcolm Gladwell's *Outliers: The Story of Success* overturns conventional wisdom about genius to show us what makes an ordinary person an extreme overachiever. Why do some people achieve so much more than others? Can they lie so far out of the ordinary? In this provocative and inspiring book, Malcolm Gladwell looks at everyone from rock stars to professional athletes, software billionaires to scientific geniuses, to show that the story of success is far more surprising, and far more fascinating, than we could ever have imagined. He reveals that it's as much about where we're from and what we do, as who we are - and that no one, not even a genius, ever makes it alone. *Outliers* will change the way you think about your own life story, and about what makes us all unique. 'Gladwell is not only a brilliant storyteller; he can see what those stories tell us, the lessons they contain' Guardian 'Malcolm Gladwell is a global phenomenon ... he has a genius for making everything he writes seem like an impossible adventure' Observer 'He is the best kind of writer - the kind who makes you feel like you're a genius, rather than he's a genius' The Times

Yardsticks - Chip Wood 1997-01-01

Expanded from its previous edition to include ages 13 and 14, this book provides teachers and parents with a quick reference on important childhood developmental issues, explaining what children should be learning and doing in the classroom at each developmental stage. The book begins by discussing how developmental issues can affect administrative and classroom decisions in the areas of mixed age grouping, ability grouping, retention, food, exercise, the structure of the school day, and racial and cultural questions. Each of the 11 chapters, one for each year, includes a narrative description and charts outlining growth patterns, classroom implications, and appropriate curriculum. The charts allow readers to identify developmental "yardsticks" for a given age. These charts outline characteristic growth patterns (physical, social, language, and cognitive) as well as what to expect in the classroom regarding vision and fine motor ability, gross motor ability, cognitive growth, and social behavior. The curriculum charts summarize the developmental continuum between ages 4 and 14, covering reading, writing, mathematics, and thematic units in social science, science, and current events. The book concludes with a list of over 100 favorite books for different ages, and resources for parents and teachers. (HTH)

Making Summer Count - Jennifer Sloan McCombs 2011

Despite long-term and ongoing efforts to close the achievement gap between disadvantaged and advantaged students, low-income students continue to perform at considerably lower levels than their higher-income peers in reading and mathematics. Research has shown that students' skills and knowledge often deteriorate during the summer months, with low-income students facing the largest losses. Instruction during the summer has the potential to stop these losses and propel students toward higher achievement. A review of the literature on summer learning loss and summer learning programs, coupled with data from ongoing programs offered by districts and private providers across the United States, demonstrates the potential of summer programs to improve achievement as well as the challenges in creating and maintaining such programs. School districts and summer programming providers can benefit from the existing research and lessons learned by other programs in terms of developing strategies to maximize program effectiveness and quality, student participation, and strategic partnerships and funding. Recommendations for providers and policymakers address ways to mitigate barriers by capitalizing on a range of funding sources, engaging in long-term planning to ensure adequate attendance and hiring, and demonstrating positive student outcomes.

Third Grade Angels - Jerry Spinelli 2012-09-01

The long-awaited prequel to the bestseller *FOURTH GRADE RATS* George, aka "Suds," has just entered third grade, and he's heard the rhyme about "first grade babies/second grade cats/third grade angels/fourth grade rats," but what does this mean for his school year? It

means that his teacher, Mrs. Simms, will hold a competition every month to see which student deserves to be awarded "the halo" - which student is best-behaved, kindest to others, and, in short, perfect. Suds is determined to be the first to earn the halo, but he's finding the challenge of always being good to be more stressful than he had anticipated. Does he have to be good even outside of school? (Does he have to be nice to his annoying little sister?) And if Mrs. Simms doesn't actually see him doing a good deed, does it even count? A warm, funny return to elementary school from master storyteller Spinelli.
